

4 steps to successful CLOUD MIGRATIONS

Discover

Discover your applications and their dependencies.

Scan your applications to determine their technologies. Scan your network to determine dependencies and usage.

Assess

What Applications do you have?
Running on what platforms?

In this step, use leading edge tools and a consultative approach to understand your IT footprint.

Plan

When will you migrate?
What are the dependencies?

Organize applications, servers and other resources into move groups and easily understand the impact when the scope invariably changes on you!

Execute

Discover your applications and their dependencies.

Scan your applications to determine their technologies. Scan your network to determine dependencies and usage.

Search for Public URLs

Enter a public domain or network address range (CIDR notation) (ex. gitlab.com or 10.0.0.0/24)

gitlab.com

160 Result(s) Found

URL	Cloud	Cloud Region	SSL Certificate Expiry
*.single.gitlab.com			23:59 Sep 12 2020
*.staging.gitlab.com			12:00 Oct 9 2020
about-src.gitlab.com	Azure	us-east-2	23:59 Aug 21 2020
about-src-staging.gitlab.com	Azure	us-east-2	
about.gitlab.com			16:16 Jun 6 2021

Servers Databases

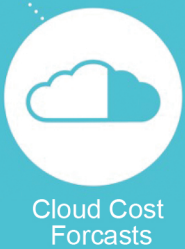

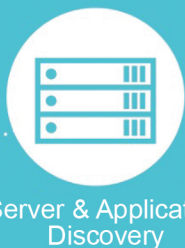

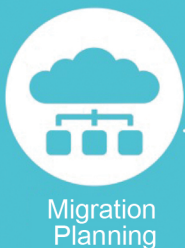

Storage (GB)

Date	Storage Used (GB)	Storage Allocated (GB)	Storage Usage (%)
2020-10-20	4806.22	19533.13	24.60
2020-10-19	3829.78	19533.13	19.60
2020-10-18	3953.37	19533.13	20.20
2020-10-17	3991.23	19533.13	20.40
2020-10-16	4188.54	19533.13	21.40
2020-10-15	4234.1	19533.13	21.70
2020-10-14	4767.04	19533.13	24.40
2020-10-13	4165.98	19333.13	21.30
2020-10-12	3444.22	19533.13	17.60
2020-10-11	3362.67	19533.13	17.20

Progress

1/18 Applications assessed

Application	Assessment Completion	Basic Information	Interview Completed	Source Code Analyzed	Database Analyzed	Dependencies Mapped	Operating Systems Identified
